AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning on page 4, line 9, with the following paragraph:

-- According to a particularly preferred application, stage c) comprises the following operating phases:

- [N] i) the solvent in which the L-carnitine was dissolved is removed partially by vacuum distillation;
- [D] ii) the same solvent in which the thioctic acid was dissolved is added, preferably in a quantity necessary to substitute the solvent removed in stage i);
- [N] iii) the mixture is cooled to a temperature between 0 and 30°C and left under stirring until complete precipitation; and
- [T] iv) the precipitate obtained is separated.--
